Paúl Romero Alvarado

During my academic training, I gained a solid understanding of the fundamentals of telematics, including networking, computer security, software development, and IoT technologies. I'm always willing to learn, adapt quickly to new technologies and face technical challenges with confidence.

EXPERIENCE

CENTOP, Babahoyo: Service technician

Noviembre 2022 - Febrero 2023

- Manage and administer the maintenance ticket system to ensure effective communication and timely resolution of reported issues.

- Perform preventive maintenance on the ECU 911 cameras, including their respective data and network connection cabinet, ensuring optimal and reliable operation of the video surveillance system.

- Prepare detailed monthly maintenance reports, documenting the activities carried out, the results obtained and the recommendations to improve the efficiency and performance of the equipment and systems.

- Efficiently organize the workspace, including the area of tools and technical equipment, to guarantee a safe, clean and orderly environment, thus facilitating the execution of tasks and the rapid location of necessary tools.

Prefectura de Los Ríos, Babahoyo: *TIC Department*

December 2020 - March 2021

- Infrastructure management and IT assistance to ensure the efficient operation of IT systems.

- Provide technical support and perform preventive and corrective maintenance tasks on computers to maximize performance and minimize downtime.

- Proactively identify and resolve network issues to ensure stable and secure connectivity, minimizing service interruption times.

- Perform operating system installations efficiently, ensuring optimum software performance and compatibility.

- Configure network equipment, ensuring a solid architecture and optimal functionality to ensure fluid and secure communication systems.

SKILLS

Project management

Flexibility/Adapting

Teamwork

Commitment

Learning capacity

COURSES

Leadership from City University Miami (2022)

Communication Fundamentals from Linkedin Learning (2022)

Economy and entrepreneurship in generation of ideas from UTPL (2021)

CCNAv7: Bridging from Cisco Academy (2021)

Secure Browsing/Mobile Security from ESET Academy (2020)

Data Science with Python from E-Learning (2020)

EDUCATION

UNIR – Universidad Internacional de La Rioja: Master in Industry 4.0. studying

- Resolution of technological challenges through the effective integration of Industry 4.0 enablers, with the aim of driving digital transformation and improving operational efficiency.

Universidad Técnica Estatal de Quevedo: Degree in Telematics Engineering. 2022

- Speaker at the IX International Congress on Society, Technology and Information, where I presented the findings and results of my degree thesis, prominently addressing the topic of Analysis of conversations with grooming context using Machine Learning techniques.

- Participant in the Robotics University Contest, representing my Telematics career and demonstrating technical and creative skills in the design and development of robotic solutions.

PROJECTS

Briefcase: *There are outstanding projects carried out.*
